Dynamic and seasoned cybersecurity professional with a passion for ethical hacking, IT security, and a keen focus on Governance, Risk Management, and Compliance (GRC). With a rich background in finance and insurance, coupled with advanced certifications including Security+, Google Cybersecurity, and Google IT Support, I bring a unique blend of technical acumen and financial insight. My journey in cybersecurity has been driven by a relentless pursuit to become the best ethical hacker and security IT tech, supported by a high IQ and an ability to grasp complex concepts swiftly.

Skills and Expertise:

- Cybersecurity Frameworks: Deep understanding of NIST and MITRE ATT&CK frameworks, enabling effective risk assessment and mitigation strategies.
- **Networking and Analysis Tools:** Proficient in Wireshark, Splunk, and other SIEM tools, offering robust network security and data analysis capabilities.
- Programming Languages: Skilled in Python and SQL, aiding in efficient automation and data management.
- **Cybersecurity Techniques:** Experienced in SQL injection, physical security penetrations, and social engineering tactics, ensuring a comprehensive security posture.
- Financial and Risk Management: Background in finance and insurance, licensed stock broker, adept at aligning financial and cybersecurity risks for optimal GRC integration.
- **Soft Skills:** Exceptional communication and documentation skills, vital for effective GRC reporting and stakeholder engagement.

Experience:

- Ethical Hacking and IT Security: Hands-on experience in ethical hacking and IT security, leveraging tools like Burpsuite, tcpdump, nmap, and John the Ripper.
- Risk Assessment and Compliance: Proven track record in identifying, assessing, and mitigating risks in line with regulatory requirements and best practices.
- Stakeholder Engagement: Effective communicator, adept at translating complex cybersecurity issues for diverse audiences, ensuring clear understanding and compliance.

Education and Certifications:

- Security+ Certified
- Google Cybersecurity Certification
- Google IT Support Certification
- Licensed Stock Broker

Goals:

My goal is to leverage my cybersecurity expertise, financial background, and passion for ethical hacking to excel in a GRC analyst role. I aim to contribute significantly to the development and implementation of robust GRC strategies, ensuring that organizations not only comply with regulations but also fortify their defenses against evolving cyber threats.
